***Prosecution History***

The examiner notes Claims 1 and 3-6 were presented for examination on 4/17/2007 and still remain pending. The examiner notes claims 2 and 7-18 have been cancelled.

The examiner notes that claims 1 and 3-6 are in condition for allowance for at least the reasons below.

***Reasons for Allowance***

The following is an examiner's statement for the reasons for allowance.

The present invention is directed to a method for data collection and reporting based on a central computer system. The invention teaches the novel features as noted in the Remarks provided on 02/13/2008.

The following reference has been identified as the most relevant prior art to the claimed invention. The prior art mostly relates a method for extracting pre-defined data items from a document and storing the extracted document data within a document database and allowing for rule based retrieval of the extracted document data.

Johnson et al. (US 5,664,109) teaches a method for

Art Unit: 3627

extracting pre-defined data items from a document and storing the extracted document data within a document database and allowing for rule based retrieval of the extracted document data (see at least, Abstract).

The examiner notes and agrees with the Remarks provided on 02/13/2008 with respect to the limitations/missing features in the claimed invention and how they novel over the Johnson et al reference. A person having ordinary skill in the art at the time the invention was made would have not been motivated to combine the missing features with Johnson et al. The examiner notes the combination of missing features and the other limitation(s) found in the independent claim make the invention novel and unobvious over the cited prior art.

The following foreign reference has been identified as the most relevant prior art to the claimed invention. The prior art mostly relates to the transfer of data, received from a form, via a telephone to a central location and further then stored data at the central location can be transmitted to other locations.

Worthington (GB 2 255 473 A) teaches the transfer of data, received from a form, via a telephone to a central location and further then stored data at the central location can be

transmitted to other locations (see at least, Abstract). The examiner notes Worthington teaches an automated transfer of data between a central location and series of other locations (see at least, page 2, lines 4-10) and further the data can come from paper forms received from a transmitting terminal (see at least, col. 24, lines 24-34).

The examiner notes that the Remarks provided on 02/13/2008 with respect to parts 4-9 in the invention can be argued similarly to the Worthington reference. A person having ordinary skill in the art at the time the invention was made would have not been motivated to combine the missing features with Worthington. The examiner notes the combination of missing features and the other limitation(s) found in the independent claim make the invention novel and unobvious over the cited prior art.

The non-patent literature has been identified as the most relevant prior art to the claimed invention(s). The prior art mostly relates a method for extracting data from preprinted forums.

The "Extraction of Data from Preprinted Forums," by Taylor et al. teaches a method that manipulates electronic images of forums in preparation for data interpretation and further an

extraction model for use of form identification, registration, and field extraction (see at least, Abstract). The examiner notes Taylor et al. teaches receiving a scanned document and performing a form identification and region extraction to extract data (see at least, introduction)

The examiner notes that the Remarks provided on 02/13/2008 with respect to parts 2 and 4-9 in the invention can be argued similarly the Taylor et al. reference. A person having ordinary skill in the art at the time the invention was made would have not been motivated to combine the missing features with Taylor et al. The examiner notes the combination of missing features and the other limitation(s) found in the Independent claim make the invention novel and unobvious over the cited prior art.

Any comments considered necessary by the application must be submitted no later than the payment of the issue fee and, to avoid processing delays, show preferably accompany the issue fee. Such submission should be clearly labeled "Comments On Statement of Reasons for Allowance."

***Conclusion***
